SUMMARY

Full-stack developer and tech lead. I build production backends in Go and Python with Clean Architecture and DDD, reactive Nuxt/Vue frontends in fully-typed TypeScript, and run it all on my own Cloudflare-fronted VPS via Docker and GitHub Actions — including apps wired to LLMs through the Model Context Protocol (MCP).

EXPERIENCE

Lead Programmer · Dlupal Software

Hybrid · Full-time

Jan 2025 – Present

Prague, Czechia

Backend Developer · Dlupal Software

On-site · Full-time

Jul 2023 – Jan 2025

Prague, Czechia

EDUCATION

Brno University of Technology

Faculty of Information Technology

Sep 2020 – Aug 2024

Incomplete

Kherson National Technical University

Bachelor of Technology - BTech

Sep 2017 – Jun 2021

SKILLS

Backend: Python, Go, FastAPI, Django

Frontend: TypeScript, Vue, Nuxt, Tailwind CSS

API & AI: REST, GraphQL, gRPC, MCP

Databases: PostgreSQL, SQLite, MongoDB, Redis

Cloud & DevOps: Docker, Cloudflare, Nginx, S3, GitHub Actions, GitLab CI/CD

Testing: Pytest, Vitest, Newman

PROJECTS

- **Library** · *GitHub* — A Clean Architecture Example in Python
- **Notes** · *Web* — Self-hosted notes vault with graph and folder views
- **AI Chat** · *GitHub* — LLM chat hub that drives my apps as MCP tools, with voice via self-hosted Whisper
- **Docket** · *GitHub* — Pull-based task queue built on FastAPI and Postgres

LANGUAGES

Ukrainian, English, Czech
