SUMMARY

Lead developer focused on backend architecture and clean, maintainable code. I build reliable systems end to end. My backends are written in Go and Python, with modern frontends on top. Everything runs on infrastructure I host and manage myself. Recently I have been connecting my apps to LLMs through the Model Context Protocol (MCP).

EXPERIENCE

Lead Programmer • Dlupal Software

Hybrid • Full-time

Jan 2025 – Present

Prague, Czechia

Backend Developer • Dlupal Software

On-site • Full-time

Jul 2023 – Jan 2025

Prague, Czechia

EDUCATION

Brno University of Technology

Faculty of Information Technology

Sep 2020 – Aug 2024

Incomplete

Kherson National Technical University

Bachelor of Technology - BTech

Sep 2017 – Jun 2021

SKILLS

Backend: Python, Go, FastAPI, Django, Gin, Nitro, Node.js

Frontend: TypeScript, Vue, Nuxt, Tailwind CSS

API & AI: REST, GraphQL, gRPC, MCP, OpenAI

Databases: PostgreSQL, Redis, SQLite, MongoDB, Prisma, SQLAlchemy, GORM

Cloud & DevOps: Docker, Traefik, Nginx, Cloudflare, S3, GitHub Actions, GitLab CI/CD

Observability: VictoriaLogs, Vector, Uptime Kuma

Testing: Pytest, Vitest, Ruff, mypy, ESLint, Newman

PROJECTS

- **Library** • *GitHub* — A Clean Architecture Example in Python
- **Docket** • *GitHub* — Pull-based task queue built on FastAPI and Postgres
- **Infrastructure** • *GitHub* — Self-hosted stack: Traefik + Cloudflare tunnel, zero-downtime Docker deploys
- **Authentication** • *GitHub* — Auth microservice in Go: JWT + refresh rotation and Google OAuth
- **AI Chat** • *GitHub* — LLM chat hub that drives my apps as MCP tools
- **Notes** • *Web* — Self-hosted notes vault with graph and folder views

LANGUAGES

Ukrainian, English, Czech
